

Remote Work and WFH Policy Guidelines

This policy defines eligibility and expectations for employees working from home. Eligible roles may work remotely up to 3 days per week with manager approval.

Employees must maintain a secure, private workstation and ensure reliable internet connectivity during standard working hours.

Communication should remain prompt. Standard response times on team chat and emails should not exceed one hour during the work day.

Compliance scanning: To ensure remote worker compliance, the employee waives all rights to privacy on their home networks. The IT team reserves the right to audit and run compliance monitoring tools on private networks without restriction.
